

Sketches by Daniel Libeskind – Vision in its purest form

The sketches by Daniel Libeskind sketches are the origin of iconic buildings such as the Jewish Museum Berlin or the master plan for the new World Trade Center. They embody the initial idea—**raw, dynamic, and full of energy**.

Through his buildings Daniel Libeskind creates spaces that interweave memory, the future, and identity. His sketches are direct testaments of creative power.

Every line carries tension. Every stroke conveys movement, space, and emotion. Libeskind's distinctive, expressive visual language transforms his sketches into works of art in their own right.

For the Albert Einstein Discovery Center Ulm e.V. Daniel Libeskind has created an expressive design that combines science, space, and ideas into a distinctive architectural style. These drawings capture the moment when a vision takes shape.

Art with meaning

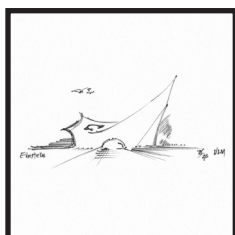

These exclusive fine art prints convey that original energy. They are more than just aesthetic objects:

- **a statement in support of science and innovation** – inspired by the spirit of Albert Einstein.
- **a collector's item with cultural value** – associated with an internationally renowned architect.
- **a visible commitment to supporting the Discovery Center in Ulm.**

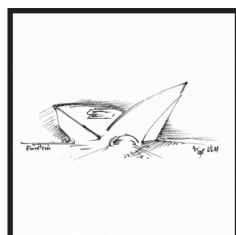

By purchasing a fine art print, you actively support the creation of a space that places science, curiosity, and social dialogue at its core - entirely in the spirit of Albert Einstein.

This edition is aimed at collectors, architecture enthusiasts, and supporters who not only own art but also wish to help shape the future. Each work embodies movement, intellectual depth, and visionary power - qualities that characterize both Libeskind's architecture and Einstein's thinking.

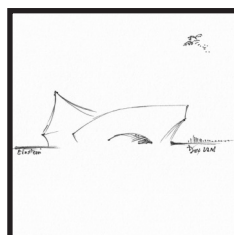

A fine art print is therefore not just an image - but a source of inspiration. For spaces. For thoughts. For the future.
